

# Our idea of diversity for Your challenges

- Electrical test of IGBTs (e.g. with voltages of up to 6000 V and pulse peaks of up to 1000 A)
- Plasma cleaning / plasma activation
- Laser marking
- Magnetic particle testing
- AOI (e.g. laser triangulation / white light interferometry)
- Lateral dispensing (needle and jet dispensing)
- Contacting of electrical components
- Sintering
- Bending / folding of flexible pcb
- Feeding solutions for bulk material (spiral conveyor / vibratory conveyor)
- Stamping of solder preforms
